

A1 SOFT EARTH
BLADED TEETH FOR SOFT EARTH / CLAY

EARTH AUGER FOR GENERAL PURPOSE DRILLING
Designed to reduce auger jam, the A1 auger features its cutters on one side as well as a restrictor plate to reduce overrun. Available in earth or tungsten carbide (TC), providing longer wear life and greater cutting performance. Not suited for rock.

A3 EARTH
BLADED TEETH FOR EARTH / CLAY / SHALE

ALL PURPOSE FOR GENERAL DRILLING
Constructed for fast efficient post hole digging, even in extreme conditions. Available in earth or multi-facet tungsten (MFT) braised onto the face of the teeth, providing longer wear life and greater cutting performance. Not suited to harder fracturable rock.

A4 EARTH
BLADED TEETH FOR EARTH / CLAY / SHALE

ALL PURPOSE FOR GENERAL DRILLING
Designed to perform in the toughest Australian conditions, the A4 auger is the Contractor's choice. Available in earth or multi-facet tungsten (MFT) braised onto the face of the teeth to provide longer wear life and greater cutting performance. Not suited to harder fracturable rock.

TREE PLANTER

Digga tree planting augers are designed to drill a smaller diameter hole for the tap root and a larger secondary hole at the top for the root ball.

The design of the cutting system will leave the hole walls rough, not glazed, meaning the plant stock has the maximum chance of establishing.
